

FALL NEWS

Lake Draw Down

The annual lake draw down will be on, Tuesday October 11, 2005. Please remember to remove your boats and watercraft by Tuesday morning.

Clean Up

On Saturday, October 22, 2005, residents of Witches Woods Lake are asked to join the Board of Directors, as we hold our second annual coordinated "Adopt-a-Lake" day. The goal for this year is to clean and protect our Lake area. The two major efforts this year will be to clear the back side of the earthen dam by cutting down all the trees and brush; and to clean the 4 creeks, that enter on to the lake, of debris that has collected in them. There will NOT be dumpsters for trash this year but the District will have a wood chipper for brush and small trees.

Please come to the Boat Lunch area on Crooked Trail Extension starting at 9:00AM to help your friends and neighbors for this year's clean up.

Lake Residents Picnic

The Board of Directors is hosting a barbecue luncheon for all residents of Witches Woods Lake. There will be hotdogs, hamburgers, potato salad, and macaroni salad. The luncheon will be at the boat launch on the north end of the lake, beginning at 11:30 a.m. We ask that residents volunteer their gas grills, picnic tables, to help us make this happen. Please bring your own lawn chairs for sitting. It is much more enjoyable to sit on a chair than just sitting on the ground. Also, please bring your digital camera to take pictures of your friends and neighbors. The photos will help capture the spirit of the day and maybe you'll see them on our website.

RAIN DAY – Saturday October 29

If it is raining on October 22, the clean-up day and picnic will be postponed until Saturday October 29th.

Web Site for Witches Woods Lake

Witches Woods Lake has a Website! Please log on to www.wwlake.com to view the site. We are asking for old photographs of the lake to enhance the webpage. Any and all ideas for what would like to see on our Website are welcome! Thanks to Cliff Moon our webmaster for developing the website.

Roads

Please keep the gutters on the roadsides clear of fallen leaves. Leaves in the gutters lead to drainage problems and road washouts. Cars should not be parked on the roadsides, especially during winter storms. Parked cars interfere with snowplowing and access to our roads by large vehicles such as garbage or fire trucks.

Road Work

John Albrecht of J. & A. Excavating and Landscaping will begin work in mid-October on installing drainage and catch basins at the upper end of Crooked Trail at the top of the hill extending to the beach area. When driving in this area, please drive slowly as there will be construction equipment and material along the roadside. Also, there will be occasional delays when equipment may be blocking traffic. Construction should take about three weeks.
